A CATALOGUE

Outpost Nurseries

RIDGEFIELD, CONNECTICUT

1941

NEW YORK OFFICE: 247 PARK AVE.

We are prepared to furnish on request without charge various illustrated and descriptive brochures and booklets dealing with the different phases of landscape planting.

A post card stating your problem will bring the literature which we believe will be most helpful in solving same.

Still further, the services of an experienced landscape representative are available without charge (within a reasonable distance from Ridgefield). We shall be glad to arrange an appointment to suit your convenience.

General Information

OUTPOST NURSERIES are growers of a complete assortment of Plant Materials as listed in this catalogue.

OUTPOST SERVICE includes the supplying of Plant Materials at our Nurseries; delivery to the client's property, or delivery and planting by an experienced Planting Crew in charge of a Landscape Foreman.

OUTPOST SERVICE also includes assistance in design; the selection and arrangement of materials, and advice on the culture and maintenance of Trees and Plants. Frequent inspections are made of our recent plantings without cost or obligation to the client.

OUTPOST PLANT MATERIALS AND SERVICE are available to the client either directly or through a Landscape Architect.

SELECTION—Clients are cordially invited to personally select their Trees and Plants.

PRICES in this catalogue cancel all previous listings, and are subject to change without notice. Prices include loading on trucks at our Nurseries, or are F.O.B. our shipping station, and include packing, except on material dug B&B, and on special bulky pieces, shipped by freight in less than carload lots, or by express, in which case material used in packing is charged additional at cost.

B&B—Some Plant Materials may be planted successfully with bare roots. Some Plant Materials of certain sizes and varieties require digging with a ball of earth so as not to disturb the root system. This ball of earth is securely wrapped and laced in burlap. This is referred to as "balling and burlapping"—B&B. Large and heavy balls are mounted on platforms.

All prices which include balling and burlapping are based on what we consider a sufficient ball in proportion to the caliper and—or size of the Tree or Plant.

DELIVERIES can be made by truck to almost any point at moderate cost, depending on the distance and quantity of material involved. Prompt shipment can be made by freight, carload lots or less, or by express.

MEASUREMENTS—All sizes are approximated as closely as possible. See details regarding particular groups under headings "Deciduous Trees," "Evergreen Trees," et cetera.

HARDINESS OF STOCK—Although within easy motor-ing distance of New York City, Outpost Nurseries are located in the foothills of the Berkshires where severe weather is experienced in the Winter season. This insures our stock being thoroughly acclimated and perfectly hardy.

CERTIFICATION OF STOCK—All stock is free of injuri-ous plant diseases and insects. Our Nurseries are regu-larly inspected by Federal and State authorities. Certifi-cate of inspection accompanies each order.

TERMS—Thirty days net to those whose responsibility is known to us, unless other arrangements are made at time of acceptance of order.

All accounts are payable to Outpost Nurseries, Inc., and not to individuals.

CLAIMS—When stock is not delivered by our truck, our responsibility ceases upon delivery of stock in good con-dition to transportation company. Claims for damage while stock is in transit should be made promptly to the transportation company.

GUARANTEE—Except for Roses and Perennials, we guar-antee to replace without charge Plant Material supplied from our Nursery and planted by us, which dies from natural causes within one year after planting, provided this material has received normal care, and provided payments have been made promptly as arranged. This guarantee excludes fatalities from tornado, severe drought, abnormal Winter or other conditions over which we have no control.

CORRESPONDENCE—Correspondence should be ad-dressed to Outpost Nurseries, Inc., Ridgefield, Conn., and not to individuals.

NOMENCLATURE—Recommendations of "Standardized Plant Names" are used as far as possible.

DECIDUOUS TREES

Deciduous Trees drop their foliage in late Fall and Winter.

Except in such varieties, where heights only are given, Deciduous Trees are measured by their caliper, i. e., the diameter of the trunk six inches above the ground for trees up to six inches caliper. Trees six inches, or over in caliper are measured one foot above the ground.

Sizes in caliper as catalogued include trees measuring the smaller size, or between the two sizes given, but do not include trees measuring the larger size. Example: Tree measuring $3\frac{1}{4}$ inches rates as 3 to $3\frac{1}{2}$ inches; tree measuring $3\frac{1}{2}$ inches, rates as $3\frac{1}{2}$ to 4 inches

Heights given with caliper measurements are general averages, and are approximate only. Where no caliper appears, height is the governing measurement.

Trees not marked "B&B" (Balled and Burlapped) can be moved with bare roots when dormant. Should balling and burlapping be desired on such Trees, an extra charge will be made at the following rates.

2-3 inches caliper	\$2.50 each
3-4 inches caliper	4.00 each
4-5 inches caliper	6.00 each

See General Information for further details
on balling and burlapping.

CHAMAECYPARIS — CYPRESS

Often called *Retinospora*; common name of this genus is Cypress, but is not to be confused with the famous Cypress of the South, which is of the genus *Taxodium*. Vary greatly in habit of growth from tall pyramidal trees to low prostrate plants; many curious and beautiful forms have been developed by propagation from young trees. The *Chamaecyparis* are greatly benefited by frequent shearing to develop compact foliage and to keep to desired size.

OUTPOST PLANT FOOD

OUTPOST PLANT FOOD is a perfectly blended and balanced formula for feeding trees, plants and lawns. It contains 75 percent organic matter and is made of things plants relish,—blood, bone, fish, cottonseed meal, **et cetera**. All these are not only rich in the necessary chemical elements, but are organic, and, as they decompose, feed the trees or plants over a period of months and add humus to the soil, leaving it in better physical condition. There are just enough chemicals added to begin feeding the plant immediately and give it the quick pick-up it needs.

Many states, including Connecticut and New York, require that samples of all fertilizers sold in the state, be submitted to the State Department of Agriculture for analysis. This analysis determines whether or not fertilizers come up to the standards claimed by the sellers. Since **OUTPOST PLANT FOOD** was first offered for sale, it has consistently tested higher and proved much finer than Outpost Nurseries claim it to be.

Trees, plants, and lawns are bound to do better if fed with **OUTPOST PLANT FOOD**.
